MARCELO GIAZZON

// FREELANCE GENEXUS DEVELOPER

> ABOUT ME

Born in Brazil in 1982, I have been programming since 1999 and working with GeneXus since 2001. With extensive experience in ERP systems across industrial, cargo and passenger transportation, foreign trade, warehousing, and banking sectors, I specialize in GeneXus extensibility through the creation of User Controls and External Objects. I also develop and maintain GeneXus modules for specific purposes. Currently, I focus on highly complex specific tasks to be integrated into larger systems. Always seeking new challenges.

> PROFESSIONAL EXPERIENCE
